Eaton’s DUOLINE multi-bag filter housing systems are duplex units for continuous filtration processes where the system flow cannot be shut down for filter bag change-outs.

This multi-bag filter housing system consists of two single bag filter housings fitted together at the inlet and outlet by a butterfly valve or ball valve assembly. The dual housing system allows the filtration process to run continuously even during filter bag change-outs. Units come standard with filter bag size 02 stainless steel restrainer baskets.

Features
- Can be equipped with the most advanced TOPLINE™ single bag filter housing, the SIDELINE™ single bag filter housing for a greater range of applications or the economical FLOWLINE™ single bag filter housing for coarse particle filtration
- System arrangement assures continuous flow rates. One unit can be taken off-line in sequence for filter bag change-outs without having to take the other filter unit off-line
- Swing bolt cover for quick, easy filter bag change-outs. The TOPLINE single bag filter housing features a domed cover. FLOWLINE and SIDELINE single bag filter housings covers’ feature an integrated ergonomic handle
- TOPLINE and SIDELINE models feature extended five year warranties and are designed in accordance with Section VIII, Division 1 of the ASME Code
- Smooth, bead-blasted finish makes it easy to completely clean the interior

Options
- Housings and fittings available in stainless steel or carbon steel for high corrosion resistance
- Available without valves, with butterfly valves or with ball valve assemblies
- Buna-N® O-rings for the cover are standard. EPDM, Viton®, PTFE encapsulated Viton or silicone rubber seals and gaskets are available
- Linkage assembly available. A quick turn of the linkage handle diverts the flow from one single bag filter housing to the other, guaranteeing a synchronized changeover

Viton® is a registered trademark of E. I. du Pont de Nemours and company.
Applications

Coarse filtration > 500 µm
Medium filtration > 10 µm
Fine filtration < 10 µm

Pre-filtration
Safety filtration
High volume
Batch filtration
Circuit filtration
Continuous filtration
Solvents, paints
Fats and oils
Catalyst, activated carbon
Acids, bases
Petrochemicals
Water, waste water
Chemical industry
Pharmaceuticals
Metal cleaning
Automotive
Electronics
Food and beverage
Paint and lacquer
Water treatment
Galvanic industry
