POLYLINE™ Single Bag Filter Housing

This single bag filter housing has no metal components to rust, corrode or contaminate the process media and is ideal for contamination sensitive or severely corrosive applications. Units come standard with filter bag size 01 or 02 polypropylene or size 02 PVDF restrainer baskets.

Features
- All plastic construction with smooth interior surfaces makes it easy to clean
- Compression hold down creates 360 degree sealing between the filter bag and the bag filter housing
- Removable, “no tools required” spin-off cover for quick filter bag change-outs. Just a few turns of the cover using the built-in handle and the housing opens and closes with little effort
- Standard design available with threaded or flanged connections
- Vent/bleed valve installed on the housing cover and an integral mounting flange for rock-solid installation without the need for support legs
- Dual outlets allow either in-line or loop piping connections with other outlet used as a drain

Options
- Available in glass fiber reinforced polypropylene or PVDF
- Viton® seals and gaskets for the cover and restrainer basket are standard. EPDM seals and gaskets are available
- Multiple I/O connections to suit application
- Round bottom restrainer basket size 01 or 02 available in polypropylene

Choice of PPL or PVDF construction for ultra-pure or corrosive applications

Eaton’s POLYLINE single bag filter housing is an all-plastic, rugged polypropylene or PVDF construction for superior corrosion resistance. The glass fiber reinforced polypropylene withstands high-pressure and temperature combinations.

Viton® is a registered trademark of E. I. du Pont de Nemours and company.
